CUSTOM SCENTS FOR INTERIOR SPACES

PRO SCENT DIFFUSER

a battery-operated scent diffuser for ultimate portability

FEATURES

State-of-the-art cold air diffusion transforming an essential oil into a microscopic mist

Battery operated/USB cable for ultimate portability

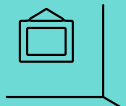

5 working programs
10 scent concentration grade levels

Accommodate spaces of up to 5,300 cubic feet

Built-in timer allows you to automatically set the misting schedule

Diffuser stands freely or easily mounted on a wall

Holds up to 500 ml of essential oil

Easy access of oil bottle for refill and maintenance of the unit

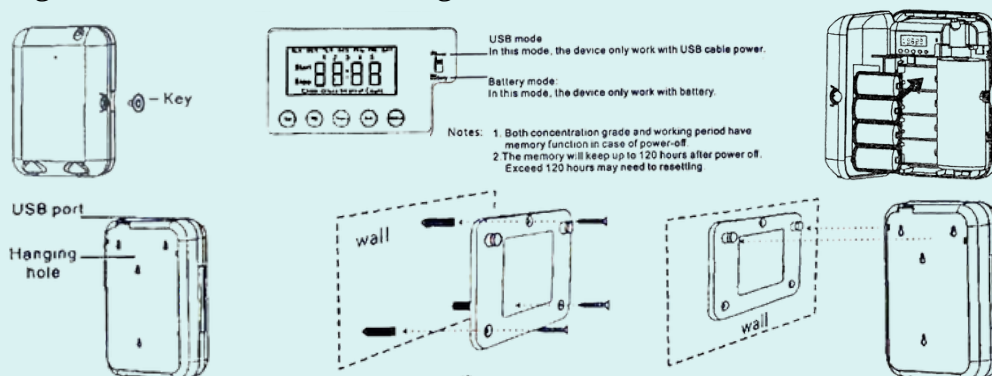

LCD display

Safe Lock design

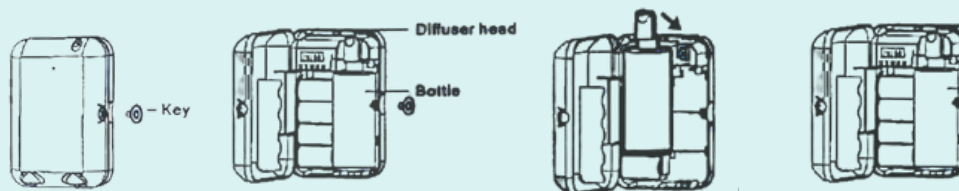

SETTING UP YOUR DIFFUSER

- 1 Find the ideal location for your diffuser. Insert the key and rotate it to open the device
- 2 Set the device to battery mode or USB mode. Insert four D batteries or plug the USB cable into an electrical outlet
- 3 Affix the mounting bracket to the wall using the three screws provided
Note: If you do not use the screws, allow the adhesive from the 3M to set for 24 hours.
- 4 Hang the device on the mounting bracket

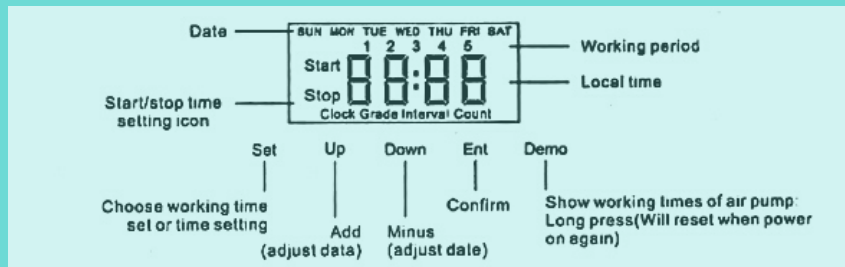

FRAGRANCE BOTTLE INSTALLATION

- 1 Insert the key and rotate it to open the device
- 2 Remove bottle and unscrew the sprayer head. Keep empty bottle for maintenance
- 3 Screw the sprayer head into your new bottle of Scented Interiors By Design fragrance oil. Note: Do not over or under tighten the diffuser head. Once the diffuser head is attached to the bottle, do not flip it over, as this causes oil to spill, and the diffuser might malfunction.
- 4 Insert oil bottle back into the device, aligning the air peg located on the back of the spray head

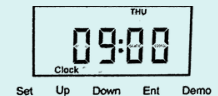

PROGRAMMING YOUR DIFFUSER

The diffuser will power on when it connects to the power source. The LCD screen will turn off after 1 minute of inactivity. Press the "SET" button for 5 seconds to turn the screen back on.

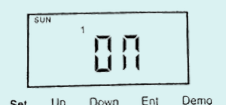

Local time and date setting

- 1 Press the "SET" button for 5 seconds to set the time and date
- 2 The hour will begin to flash. Press the "UP" or "DOWN" button to adjust the hour and save the setting by pressing the "ENT" button. The diffuser operates on Military time with the hours 0-24. After saving the hour, repeat the process to set minutes and days
- 3 After confirming the day of the week, press the "SET" button to save the setting

Diffuser working program and concentration level setting

- 4 Press the "SET" button to set the working program and concentration level. There are up to 5 working programs per day
- 5 Select the working period and press the "ENT" button to save. Press the "Set" button to change the working program
- 6 Use the "UP" or "DOWN" button to set the hour and minute and press "ENT" to save. Repeat the process to select the "Stop" time. The diffuser operates on Military time with the hours 0-24
- 7 Select the concentration "Grade" by pressing the "UP" and "DOWN" buttons. Press "ENT" to save. There are 10 concentration grade levels. Recommended concentration grade level: 05. Refer to the concentration chart below
- 8 Press the "UP" button for "ON" and the "Down" button for "OFF" to set the working program to each day of the week and press "ENT" to save. If all the programs from Sunday to Saturday are the same, you only need to set the program for Sunday, and you can select "ON" to repeat the working program for the following days of the week
- 9 Once you have programmed your whole week, press the "SET" button to save your setting
- 10 To set additional working programs, repeat steps 3 to 7. If the programs are different for each day, you will need to select the daily program individually by repeating steps 3 to 7

SAFETY

The following basic safety precautions should always be observed.

- Please keep the machine in a VERTICAL position
- Tilting the unit or lying flat when oil is in the unit will cause spillage and may affect the machine's efficiency and/or damage the pump
- Clean the machine periodically with rubbing alcohol using the spare bottle and run for 10 minutes, especially when changing to a different fragrance oil. This will remove any oil build-up or remains of a previous oil

Note: Our oils are designed to specifically work with each of our scent diffusing systems. Do not use any oils other than Scented Interiors By Design Ltd. oils. Use of any oils other than those made by Scented Interiors By Design, Ltd. may damage the machine and will void the one-year warranty.

SCENT MISTING & OIL CONSUMPTION GRADES

CONCENTRATION GRADE	G1	G2	G3	G4	G5
PAUSE (Minutes)	15	13.5	12	10.5	9

CONCENTRATION GRADE	G6	G7	G8	G9	G10
PAUSE (Minutes)	7.5	6	4.5	3	1.5

Notes:

1. All the above concentration grades mist for 5 seconds. Pause time decreases as concentration grade increases.
2. Consumption Average: 0.13-1.2ml/hr. 500 ml will last for about 6 - 8 weeks on concentration grade 5
